03 · OVERVIEW

Built for the road.

Logline

Navigation built for big trucks. Set your truck's height, weight and length and get routes that respect them, with low-bridge alerts, truck stops, offline maps and music controls right on the map.

Synopsis

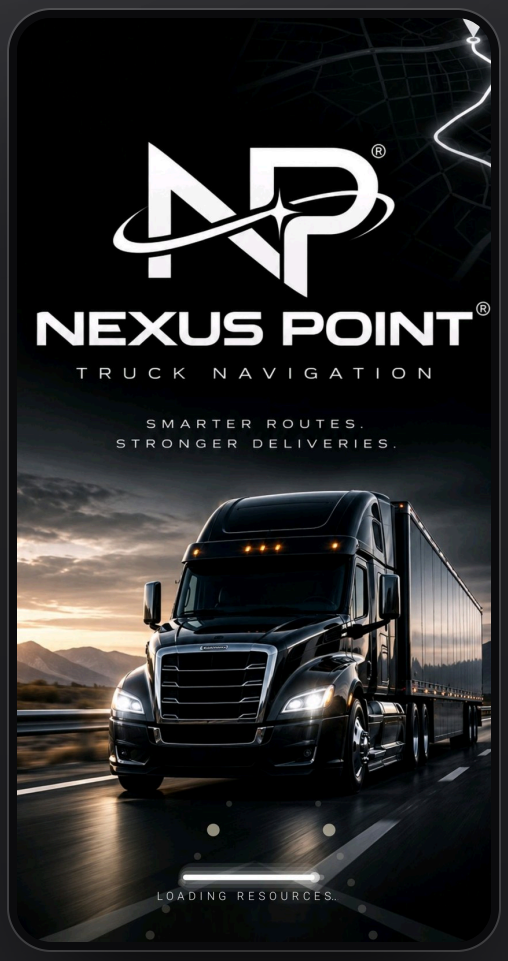

Nexus Point Truck © is a truck GPS navigation app for Android phones and tablets. There is no account and no sign-in: after the loading screen it opens straight to the map. Everything a driver needs sits on one black-glass map: truck-safe routing, low-bridge clearances, truck-stop and fuel pins with brand icons you recognize, offline maps for weak or no signal, and a floating music player for Spotify or YouTube Music.

The app is sold once, for $26.99, as a direct Android APK. It shows no ads and contains no analytics or tracking code.

Who it's for

Truck drivers who want routing that respects their rig, the stops they actually use, and a map that keeps working when the bars drop.

> **Edition note.** This is the Standalone edition: no fleet Management or dispatch features, and no fleet location sharing.

The Nexus Point Truck © loading screen. Real capture from the running app.

ACCESS

No account

No sign-in, approval or device lock. It opens straight to the map.

PRIVACY

No ads, no analytics

No advertising, analytics or tracking code in the app.

COVERAGE

Offline USA

Download one state, the current view, or all US states for weak signal.

© 2026 Johnny Haynes. All rights reserved. · Nexus Point Truck ©

04 · KEY FEATURES I

Maps, routing, offline USA.

Mapbox maps

The map is drawn by the Mapbox Maps SDK for Android (v11), using the Mapbox Navigation Night style, with day, night and automatic (sunrise / sunset) map modes. Live traffic, incidents and speed limits come from Mapbox; map data is © OpenStreetMap contributors. The Mapbox logo and attribution are shown on the map.

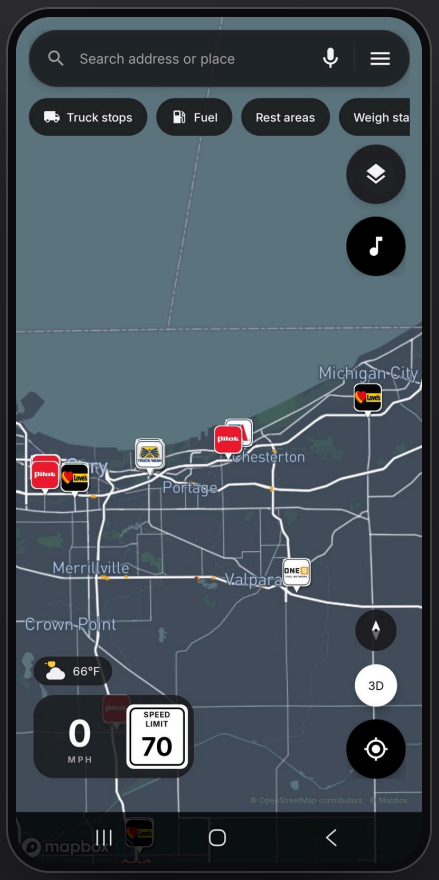

Truck-safe routing

The Truck profile holds height, width, overall length, gross weight and axle count, plus presets (for example Bobtail tractor and Tanker · hazmat), hazmat, avoid toll roads and avoid ferries. Routing avoids low bridges, weight limits and truck bans that are mapped in OpenStreetMap.

Routing engine: Automatic (online truck routing when connected, offline data otherwise), Online only (OpenRouteService HGV) or Offline only (on-device GraphHopper).

Low-bridge clearances

A Low bridges overlay marks low clearances from OpenStreetMap when you zoom in. Always follow posted signs.

Navigation map: search, layer chips, speed and the posted limit. Real capture.

Offline USA map download

Open **Offline maps & routing** and choose **Download all USA**, **Download a US state**, or **Download current map view**. All-states downloads run one state at a time in alphabetical order, can be paused and resumed, and keep finished states on the device. Detail levels: Highways & towns (z0–9), Standard (z0–11) and Detailed streets (z0–13).

Offline truck routing: the app can build a truck routing graph on the phone from a state's OpenStreetMap extract (Geofabrik), honoring mapped height, width, length, weight and axle-load limits, truck bans and hazmat restrictions. Small and medium states work best; very large states (e.g. CA, TX) may exceed phone memory. Detailed downloads can be several hundred MB, so use Wi-Fi.

05 · KEY FEATURES II

Stops, icons, music.

Truck-stop pins with their own icons

Truck stops, fuel and rest areas show along your route with brand icons you recognize. Each category has its own toggle: Pilot / Flying J / One9, Love's, TA / Petro, Maverik, rest areas & truck parking, truck washes, weigh stations, CAT scales and Walmart (truck-friendly parking). These are the pin icons shipped in version 9.0.30:

Brand names and logos belong to their owners and are shown only to identify locations on the map. Stop data: OpenStreetMap (Overpass) and All the Places (CC0). A **Nearest CAT scale** tool looks up the closest scale in OpenStreetMap; coverage is incomplete, so use the official locator at catscale.com when none is found.

♬ Music on the map

Control Spotify or YouTube Music from a floating player you can drag anywhere. Choose Phone (smaller) or Tablet (bigger) in Settings.

🔊 Volume booster

Boost media volume up to 700% for a loud cab. A one-time hearing warning appears the first time you go high.

◈ Map icon

Your position shows as a blue triangle by default, or pick a **Custom map icon** (transparent PNG or WebP) in Settings.

Languages

Menu → **Language** switches the app's language in place:

System default · English · Español · Français · Русский · Українська · ਪੰਜਾਬੀ (Punjabi)

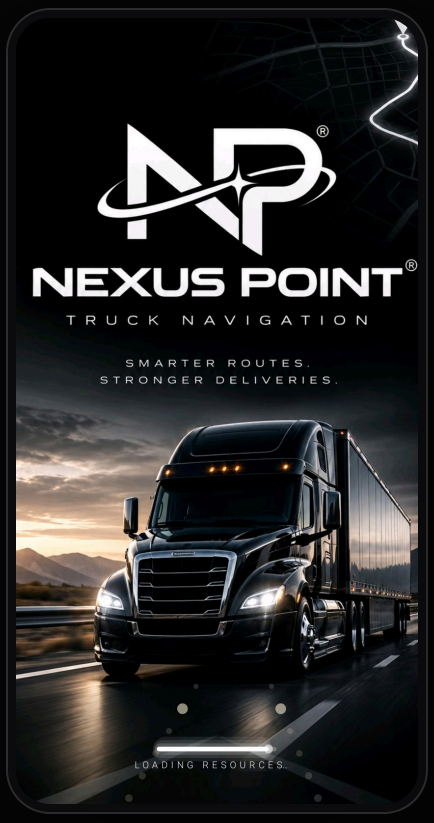

Also on board: voice guidance, weather radar and temperature, US or metric units, saved places and search history.

07 · INSTALL GUIDE · ANDROID APK

Install in four steps.

1 Download

After your Stripe payment you are taken to your download page. Open it **on your Android phone or tablet** and tap **Nexus Point Truck © for Android**. The link works for 24 hours, as many times as you like. Downloaded on a computer? Copy the APK file to your phone (USB cable, Google Drive or email to yourself).

2 Allow install from unknown sources

Nexus Point Truck © is installed directly, not from Google Play, so Android asks for permission once.

1. Tap the downloaded file (in Chrome's downloads or the **Files** app).
2. If you see **"For your security, your phone is not allowed to install unknown apps from this source"**, tap **Settings**.
3. Turn on **Allow from this source**, then press Back.
4. Tap **Install**.

Path on most phones: Settings → Apps → Special app access → Install unknown apps → Chrome (or Files) → Allow from this source. Samsung: Settings → Apps → ⋮ → Special access → Install unknown apps.

3 Google Play Protect warning

Play Protect may say **"Unsafe app blocked"** or **"App scan recommended"** because the app didn't come from the Play Store. This is expected for direct downloads.

1. Tap **More details**.
2. Tap **Install anyway**.
3. If asked to send the app for scanning, you can choose either option. Installation continues.

4 Open the app

Open **Nexus Point Truck ©** from your home screen. You'll see the loading screen, then the map. Continue with **Getting started** on the next page.

Only install Nexus Point Truck © from your personal download page at jhconsultnow.com. Keep the page and link private.

Link expired or failed? Email Johnnyhaynes12@gmail.com with your Stripe receipt and a new link will be issued.

08 · GETTING STARTED

First launch.

There is **no sign-in, no name or phone number and no approval**. After the loading screen the app opens straight to the map.

1 Allow Location

Choose **While using the app** so navigation can follow your truck.

2 Set your Truck profile

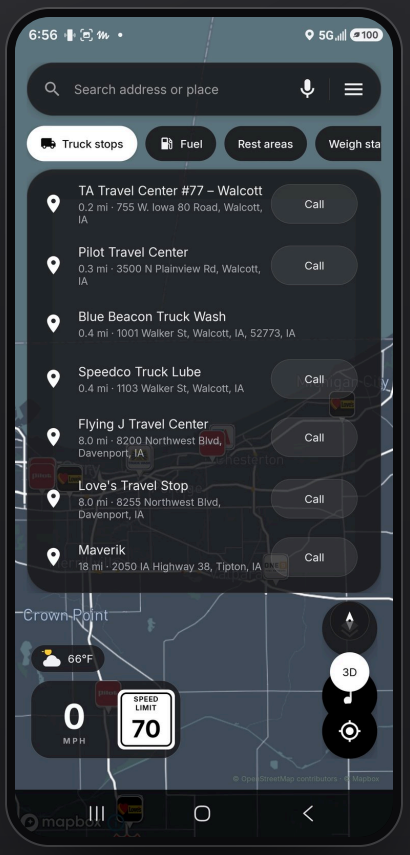

Enter height, weight and length (plus width, axles and hazmat if they apply), then **Save truck profile** for truck-safe routes.

3 Download offline maps

Use **Offline maps** to download the areas you drive, ideally on Wi-Fi, so the map keeps working with weak signal.

4 Pick your music player size

Settings → **Music player size** → **Tablet (bigger)** or **Phone (smaller)**. Drag the floating player anywhere on the map; double-tap its top tab to reset its position. To show your music, allow **notification access** when asked, then pick Spotify or YouTube Music.

Truck stops nearby, with Call buttons. Real capture.

YouTube Music and background playback

With YouTube Music Premium

Music keeps playing in the background while you navigate, and you control it from the Nexus Point Truck © player.

Without Premium

YouTube Music plays only while the YouTube Music app is open in front. Background playback is a YouTube Premium feature; Nexus Point Truck © can't unlock it. Spotify works as your Spotify plan allows.

> **Drive safely.** Nexus Point Truck © is a navigation aid. Always obey road signs, posted clearances and weight limits, and the law. Do not interact with the app while driving.

09 · PRIVACY AND PERMISSIONS

Private by design.

No account, no ads, no analytics. The developer does not run a server that collects your location, and does not sell or share your data.

Android permissions in version 9.0.30

LOCATION	Precise and approximate location, for navigation that follows your truck (asked at first launch)
INTERNET	Internet and network / Wi-Fi state, for live maps, routing, search and traffic
AUDIO	Modify audio settings, used by the volume booster
FOREGROUND SERVICE	Foreground service (media playback type)
OPTIONAL	Notification access, only if you want to show and control Spotify or YouTube Music; and notifications

What goes where

On your device

Your truck profile, saved places, settings (such as music player size and volume booster level) and downloaded offline map areas stay in the app's private storage. What's playing in your music app stays on your device.

To map services

To show maps, routes, search results and traffic, the app sends requests, including your current location, route and destinations, to the mapping and routing services it uses. They are used only to answer the request, under those providers' own privacy policies.

When you buy

Payment is handled by Stripe; the developer never sees or stores your card number. The name and email on your Stripe receipt are used only to deliver your download, answer support and handle refunds.

Deleting your data

Uninstall the app, or use Android Settings → Apps → Nexus Point Truck © → Storage → Clear storage. Email the developer to have your purchase email removed from support records.

10 · SUPPORT, LEGAL AND CREDITS

The credits.

Support

Email **Johnnyhaynes12@gmail.com** with your Stripe receipt.
Website: jhconsultnow.com/nexus-point

Refunds

Request within 7 days of purchase with your Stripe receipt. Approved if the app won't install or run on a supported device after we've tried to help, or if you were charged in error or twice. See the Merchant Policy.

Legal

You receive a personal, non-exclusive, non-transferable license to use Nexus Point Truck © on Android devices you own or control. Do not resell, redistribute or share the APK or your download links. The software is provided "as is". Map, clearance, traffic and speed-limit data can be incomplete or out of date; the driver is always responsible for the vehicle. Nexus Point Truck ©, its name, logo and artwork are the property of the seller. Full documents: Terms of Service, Merchant Policy and Privacy Policy at jhconsultnow.com/nexus-point/.
